

# 4Life Transfer Factor®

## Tri-Factor™ Formula

## The Superpower of Immune Support

A healthy life requires a healthy immune system. There's no getting around that. Modern-day science continues to reinforce the essential function of this amazing protection system and the importance of supporting and maintaining immune system health.

4Life Transfer Factor Tri-Factor Formula contains ingredients made by the immune system, for the immune system. It represents a revolutionary advancement in immune system science and dramatically raises the bar on the standard of support for immune system health.

## Key Points

- **Transfer Factor E-XF:** Transfer factors are molecules found within the bodies of all mammals and birds. Transfer factors provide immune **intelligence** and promote the immune system's ability to recognize, respond to, and remember invaders seeking to threaten health. Transfer Factor E-XF™ is 4Life's advanced transfer factor blend. Through a patented process exclusive to 4Life, transfer factors from both cow colostrum and chicken egg yolks are combined to produce synergistic immune-enhancing support.
- **NanoFactor™ extract:** Nanofractions are low-weight molecules found in the immune systems of certain mammals and birds. They possess natural **intuition** and function as part of the complex "command and control" network of the immune system. NanoFactor is 4Life's patent-pending extract of nanofractions from cow colostrum. NanoFactor helps immune cells know when to act, how to act, and when to rest.

While transfer factors and nanofractions each provide effective immune support on their own, intelligence and intuition are both needed for optimal immune response. **4Life Transfer Factor Tri-Factor Formula** brings together the **intelligence** of 4Life Transfer Factor and the **intuition** of NanoFactor, to regulate, boost, and balance the immune system... **according to what your body needs.**

- **Scientifically Studied:** 4Life Transfer Factor Tri-Factor Formula was developed by 4Life researchers and scientists in an effort to maximize immune system support. Results of an independent study showed that 4Life Transfer Factor Tri-Factor Formula propelled Natural Killer (NK) cell activity to a remarkable 283 percent above normal immune system response.<sup>1</sup>

## Did you know?

Transfer factors and nanofraction molecules can be shared safely and effectively. Whether they are transferred from cow to human or from chicken to human, these molecules are not species specific..

## Technical Points

- Natural Killer (NK) cells are important immune cells that seek and destroy harmful cells through direct contact. When invaders enter your body, these NK cells are on the front lines of your immune defense.
- The extraction processes for transfer factors from egg sources is protected by US patent 6,468,534, and the combining process for transfer factors from cow colostrum and egg yolks is protected by US patent 6,866,868.

1. Test results obtained from two independent NK cell studies conducted by Dr. Anatoli Vorobiev, head of Immunology, at the Russian Academy of Medical Science. The blinded studies tested 4Life Transfer Factor E-XF (the primary ingredient in Tri-Factor Formula) and other immune system products.

### Ordering Information

Item # 24070 - 60 ct/bottle  
Item # 24071 - 12 for the price of 11

Tri-Factor Formula

**DIRECTIONS:** Take two (2) capsules daily with 8 oz of fluid.

## Supplement Facts

**Serving Size:** Two (2) Capsule  
**Servings Per Container:** 30

Amount Per Serving	%DV*
4Life Tri-Factor® Formula	600 mg †

### Transfer Factor E-XF™

A patented concentrate of transfer factors and other natural components from cow colostrum and egg yolk.

### NanoFactor™

A proprietary concentrate of nanofiltered cow colostrum.

\* Daily Value

† Daily Value not established

**Other Ingredients:** Ingredient: Gelatin capsule and maltodextrin. Ka

CONTAINS INGREDIENTS FROM MILK AND EGG.
